

The multi-million pound 5 star hotel development by the Rocko Forte Group in the centre of Manchester required the highest quality interior fittings throughout.

We were selected to supply and install panel glide systems to all 142 bedrooms, motorised roller blinds to the ballroom and mono control venetian blinds to the leisure areas.

The panel glide systems which were installed in the restaurant contained the largest of the 'Kelly Hoppen' designed fabric panels.

Benefits

Aesthetically pleasing
Specialist design fabric
