Astralux 4000

room darkening systems

The Astralux 4000 room darkening system is available in an extensive range of options to suit virtually any application where total light control is required. As with all Astralux products the systems are designed for use in commercial, education, healthcare and leisure environments providing ease of operation, low maintenance and durability.

DESCRIPTION

These room darkening systems consist of an aluminium barrel onto which the specified black-out fabric is securely fastened. To achieve a high degree of light exclusion a cassette system is used with a headbox, side channels and an optional bottom channel. The fabric runs within the side channels and if required can be held securely using crossbars or a zip system.

Astralux 4000

room darkening systems

The Astralux 4000 room darkening system is available in a range of flame retardant 100% black-out fabrics including:

- Anti-microbial
- Energy saving

CONTROL OPTIONS

- Side chain, where the blind is raised or lowered by a continuous chain located on one side of the blind
- Spring operation for smaller blinds
- Gearbox operation with fixed or removable handle to prevent unauthorised use
- Motorised - hard wired, radio controlled and BMS systems
