

The Trilogy, Ellesmere Street, Manchester

Front Elevation

Blinds to typical bedroom

Project

The Ellesmere Street project, comprising three residential buildings, varying in height between eight and 12 storeys within a 1.25-acre site, has created 232 high-specification, aspirational living spaces with a strong sense of community in the Castlefield area of Manchester.

The client wanted a 'minimalist' shading solution which was very easy to use yet strong and durable to cope with the demands of continuous daily living.

Solution

Having worked together on projects in the past, Graham Construction contacted Pentel Contracts to offer a solution which satisfied all the client's requirements.

It was agreed that the Astralux 3000 roller blind system using the Century range of dim-out fabrics would offer the ideal solution both in terms of aesthetics, but also functionality.

Benefits

- Effective control of glare and solar gain
- Simple and quick to operate
- 'Minimalist' design
- Robust and durable solution
