## vertical blind systems

The Astralex 1000 vertical blind system is suitable for virtually any type of vertical glazing. As with all Astralex products the systems are designed for use in commercial, education, healthcare and leisure environments providing ease of operation, low maintenance and durability.

### DESCRIPTION

This vertical blind system comprises an aluminium headrail with flame retardant fabric louvres. The louvres can be fully drawn and can be tilted to accurately attenuate the amount of light entering the space. A range of manual and motorised operating controls are available.

# Astralux 1000

## vertical blind systems

The Astralux 1000 vertical blind system is available with 89mm or 127mm wide louvres in an extensive range of fabrics and colours including:

- Anti-microbial
- Black-out
- Dim-out
- Glare control
- Energy saving
- Heat reflective
- Metallised
- Screen

### CONTROL OPTIONS

- Cord and chain, a continuous cord on the side of the blind traverses the louvres and a continuous chain tilts the louvres
- Mono-command, where one continuous chain both traverses and tilts the louvres
- Wand, where a wand is fixed to the leading louvre and is used to traverse as well as tilt the louvres
- Fixed Crank, ease of operation from one side of the blind with a built in slip clutch which offers continuous movement of louvres (tilt and traverse)
- Motorised, low voltage and 240v systems for tilt only or full operation
